It's an award-winning, full-service creative digital agency that offers a comprehensive range of services to create focused media. Responsibilities:

- Converting the designs into fully working websites (responsive)
- Enhance my skills and learn more about best practices, animation and performance

Tech stack: HTML, CSS3, Javascript, jQuery

EgyBlanco - Frontend Develop   Jun 2012 - Dec 2013

I was a Fullstack developer who's responsible for converting the designs into fully working websites (responsive).

Tech stack: HTML, CSS, Javascript, jQuery

Achievements

Wazaker – Daily Aya   installs: +10k - reviews: 4.8/5

It's a mobile app that helps people connect with the Holy Quran and sends a random verse daily. They can read, listen, search, and share verses with friends.

Tech stack: Figma, React Native, Firebase

Links: wzkr.page.link/ard - wzkr.page.link/ios

Quran Tab - Chrome extension   installs: +20k - reviews: 4.9/5

It renders a new verse with every tab you open and you can read it with the translation and listen to it too. Also, it provides data like the weather, prayer times and the Hijri date.

Tech stack: Figma, React, Typescript, Playwright, Firebase
